At Abacus Solutions we form relationships with our customers as an IT strategic advisor. We believe that “simple is brilliant”, and we work to prove it.

ABACUS SOLUTIONS CORE COMPETENCIES

VIRTUALIZATION

Our virtualization solutions allow you to utilize the capacity of your data center while drastically reducing the number of servers and storage units required. We have experience in the complete spectrum of virtualization technologies and vendors, so we can find the solution that best suits your environment and specific needs.

ENTERPRISE STORAGE

Our Senior Engineers come up with solutions that store data without adding a surplus of extra storage systems to the data center. Management, configuration, training, and scalability planning are all standard across every storage solution we sell. As a vendor agnostic company, our solutions are packaged with the storage system that works best for your needs, not the manufacturer's.

NETWORK

SECURITY, OPTIMIZATION, LOCAL, WIDE AREA, ENTERPRISE

The company's network is vital to daily business. The Abacus engineering team provides assessments, architects WAN and LAN solutions, and develops network solutions that work within your business needs. We ensure that you can access information quickly and securely.

BUSINESS CONTINUITY

Having a reliable business continuity solution keeps your data center running and your data protected. Our engineers work within your company's RPO and RTO objectives to architect the best solution that ensures your business remains operational despite planned or unplanned downtime.

DISASTER RECOVERY

- Our DR solutions establish a plan for, and mitigate the situation in case of disaster.
- Our engineers plan, configure, and deploy a disaster recovery solution within your environment to ensure it operates successfully, before encountering a disaster.

REPLICATION

- Doubly protect stored data by replicating it and sending it to a remote storage site.
- Our engineers can architect a solution that includes storing replicated data at a remote site hosted by Abacus Solutions.

EMAIL ARCHIVE & DIGITAL RECORDS RETENTION

It is imperative that companies comply with all legal requirements and guidelines regarding archiving business related emails and documents. The EMA: Enterprise Managed Archive appliance, introduces a simple, easy to implement, comprehensive solution to protect your critical information and make it available to your entire organization at a moment's notice.
